

# SAP

Connect IT has been delivering SAP Consultants since our conception in 2000. We provide recruitment services to a large number of companies in various sectors on a permanent and contract basis.

Our SAP division is a well established department supplying SAP Consultants to clients throughout Europe on both a contract and permanent basis. Its objective is to assist companies who use SAP either directly or alongside SAP partners to deliver enhanced functionality and improved business benefit from their software implementation.

We also work closely with the business partners helping them resource projects ranging from short term training assignments to global Greenfield implementations.

We have a good understanding of the project life cycle enabling us to supply the right candidates at various phases of projects and also pre-empting what requirements will be coming through in the future

Our experience of working within this vertical sector means that we are ideally positioned to understand our clients needs and to provide high quality solutions to your business.

Critically it means that we are in contact with the best candidates for this sector.

Modules that we cover include (but are not limited to): -

- MM
- IS-U
- SRM
- FI/CO
- SD
- AFS
- HR
